1816 *CLEVELAND Min.* 9 The primitive forms of crystals can be ascertained only by mechanical division. This process, sometimes called *cleavage* by lapidaries, consists in separating thin layers or slices from the sides, edges, or angles of a crystallized substance in a given direction. 1831 *BREWSTER Optics* xvii. § 90. 145 We may by a new cleavage replace the imperfect face by a better one.

b. *Min.* Arrangement in laminae which can be split asunder, and along the planes of which the substance naturally splits; fissile structure; the property of splitting along such planes.

1830 *SIR J. HENSCILL Stud. Nat. Phil.* 201 The texture or cleavage of a mineral. 1869 *ROSCOE Elem. Chem.* 191 Crystalline bodies exhibit . . a peculiar power of splitting in certain directions more readily than in others, called *cleavage*.

c. *Geol.* *Slaty cleavage*: the fissile structure in certain rocks, especially in clay slate and similar argillaceous rocks, whereby these split into the thin laminae or 'slates' used in roofing, etc. This structure is quite distinct from, and in origin posterior to, the stratification and jointing, the cleavage-lines crossing these at any and every angle, while parallel to themselves over extensive tracts of country.

Geol.* 121 This superinduced fissility or 'cleavage' has resulted from an internal rearrangement of the particles in planes perpendicular to the direction in which the rocks have been compressed.

d. (with *pl.*) The direction or plane in which a crystal or rock may be split.

1817 B. JAMIESON *Char. Min.* 135 The cleavages are not parallel with any of the planes of the crystal. 1869 *TYNDALL Light* 73 By following these three cleavages, it is easy to obtain from the crystal diamond-shaped laminae of any required thinness.

**Cleave**, var. of **CLEVE**, cliff, steep declivity.

**Cleave** (klāv), *v.1* Pa. t. **cleove**, **cleave**, **cleaved**, **cleft**; Pa. pple. **cloven**, **clove**, **cleaved**, **cleft**. Forms: see below. [Common Teut.: OE. *clifan*, *clēfan*, pa. t. *claf*, pl. *clufon*, pa. pple. *clufen*, corresp. to OS. *clifan* (MDu. *clieven*, *clieven*, Du. *klieven*), OHG. *chlōban* (MHG., mod.G. *kleben*), ON. *kljīfa* (Sw. *kljīva*, Da. *kløve*), not recorded in Gothic:—OTeut. type \**kleub-*, *kleub-*—*klubum*, *klubano-*, corresp. to pre-Teutonic \**gleubh-*, in Gr. γλυφ- 'to cut with a knife, carve', and peih. L. *glīb-* 'to peel, flay'.

The early ME. inflexion was *cleoven* (clēven), *clēf* (pl. *clufen*), *clōven*. Assimilation to the pa. pple. soon changed the plural of the pa. t. to *cloven*, *cloue*, and by 14th c. *cloue* was extended to the singular, where *clēf*, *clēve*, became obs. about 1500, making the later inflexion *clōve*, *clōve*, *clōven*. The pa. pple. had also the shortened form *cloue*, which survives as a variant in poetry. A pa. t. *cloue* occurs in northern writers in 14th c., passed into general use, and was very common down to c. 1600; it survives as a Bible archaism. A weak inflexion *cleaved* came into use in 14th c.; and subsequently a form *cleft*; both are still used, *cleft* esp. in pa. pple., where it interchanges with *cloven*, with some differentiation in particular connexions, as 'cleft stick', 'cloven foot': see these words.

From the 14th c. the inflexional forms of this verb have tended to run together with those of **CLAVE** 'to stick'. Though the latter was originally *clive*, it had also the variants *cloue*, *clōve*, the latter of which at length prevailed; the two verbs having thus become identical in the present stem were naturally confused in their other inflexions. The (originally northern) pa. t. *cloue*, which appeared in both in 14th c., is not normal in either; it was apparently analogical, taken over from one of the other classes of strong vbs. having a in the past, as from *biēke*, *brake*, *broken*, *speke*, *spake*, *spoken*. (It would of course be possible to explain the pa. t. singular *cloue* in the same way.) The weak pa. t. and pa. pple. *cleaved* were probably mainly taken over from **CLAVE**, where they were original; but they might also arise independently in this verb. For the subsequent shortening of *cleaved* to *cleft*, there was the obvious precedent of *leave*, *left*, *berewe*, *berest*, etc.]

**Cleave** (klāv), *v.2* Pa. t. **cleaved**, **cleave**;

Pa. pple. **cleaved**. Forms: see below. [OE. had two verbs; *clifan* str. (\**claf*, pl. *clifon*, *clifien*), and *clifian*, *clēofian* vtr. (*clēofde*, -*od*). (1) The former was a Com. Teut. strong vb., in OS. *bi-klifan* to adhere (MDu. *clifan* to cling, climb, Du. *beklijven* to adhere, stick), OHG. *chlōban* (MHG. rare, *klīban*) to adhere, stick, ON. *klīfa* to clamber, climb by clinging:—OTeut. \**klīb-an*, perhaps ultimately f. simpler root *klī-* to stick; cf. CLIMB, CLAY, CLAM. Of this str. vb. OE. shows only a few examples of the present, its place being generally taken by (2) the derivative *clifian*, corresp. to OS. *clifon* (MDu. *clōven*, Du. *kleven*), OHG. *chleiben* (MHG. and G. *kleben*):—OTeut. \**klībjan*, f. weak stem *klīb-* of the strong vb. This had in OE. the variants *clifian*, *clēofian* (with o or u fracture of i; cf. *clifan*, *clēofian*, to live, Sc. *leue*), whence in ME. *clive*, and *clēve*, *cleve*; the latter finally prevailed, and is now written *cleave*. Instead of the normal pa. t. and pple. *clived*, *clowed*, we find also from 14th c. *cloue*, occas. *clēf*, *clōf*, *cloue*, and in 17th c. *cleft*; in the pple. *cloue*, *cloue*, and *cleft*. At present *cleave*, *cleaved*, is the ordinary inflexion, but the influence of the Bible of 1611, in which *cleave* is frequent (beside, and in the same sense as, *cleaved*), has made that an admissible form: *cloue*, *cleft* are now left to **CLAVE** v.1.

The final predominance of *cleve* rather than *clive* as the ME. form made the present stem identical in form with that of **CLAVE** v.1 to split. Hence their inflexional forms were naturally also confused, and to some extent blended or used indiscriminately. The pa. t. *cloue* attached itself in the 14th c. to both; in this verb it corresponds to the original strong pa. t. \**claf*, but does not appear to be continuous with it; it was prob. a new form due to analogy: see note to **CLAVE** v.1. The occasional pa. t. *clef* belongs properly to **CLAVE** v.1; as perhaps also *clōf*, *cloue*. (The occas. pa. pples. *cloue*, *cloue*, are from the pa. t.) The weak inflexion *cleaved* is of course proper to this verb, and prob. was transferred hence to **CLAVE** v.1. The shortened *cleft* found in both, appears to be due to the analogy of *leave*, *left*, *berewe*, *berest*. To the same analogy is probably due the mod. spelling *cleave* in both verbs; this is not etymological for both words had close e in ME., and would properly now be *cleve* or *clieve*.]

CLAY, representing the original OE. form of the nominative, *clæa* (cléo); while *claw* represents the oblique cases (*clawe*, etc.), and the later nominative *clawu* reconstructed on these. See CLAW.]

*Clæa* occurs in *Vesp. Pr.*, and, with dat. pl. *clæam*, also in (9 WS.) *Alexander's Epistle to Aristotle* 375, 378; a dat. pl. *clām* in *Phantia* 277 may possibly be for *clāam*. *Clæa* represented prehist. *clau*, *claw*, or *clæu*, from original \**klawōn* or \**klawōn* (cf. *clæa*, *clæa*: Sievers *Ag. Gram.* § 112). Of *clæa* the history is not quite clear; it might be a northern form corresponding to *clæa* (from *claw*), as *clæa* did to *clæa* (see Sievers *loc. cit.*). It is the normal source of ME. *claw*, *clæ*; ME. *claw* may represent OE. *clæa*; the later spelling *clay*, *clay* is unexplained.]

Music. A character placed on a particular line of a stave, to indicate the name and pitch of the notes standing on that line, and hence of those on the other lines and spaces. Sometimes loosely = stave.

There are three clefs in use, the C, tenor, or alto clef, the G or treble clef, and the F or bass clef, which denote respectively the middle C on a piano, the G above, and the F below. They are written respectively as here shown.

stage of a building, 'floor' of a house. (*Clere*  
must here have meant 'light, lighted', since the  
sense 'free, unobstructed' did not yet exist: see  
**CLEAR** a.)

This assumed derivation is strengthened by the parallel  
*blind-story* (see **BLIND** a. 16), although this may have been  
a later formation in imitation of *clere-story*. The great  
difficulty is the non-appearance of *story* in the sense required  
before c 1600, and the absence of all trace of it in any sense  
in 14th, 15th, and chief part of 16th c. At the same time  
there is a solitary instance of *story* in R. Glouc. (1724) 187,  
which may mean 'elevated structure' or 'fortified place'.  
The sb. *estorie* in OF. had no such sense, but the pa.  
pple. *estoré* meant 'built, constructed, founded, established',  
instituted, fortified, furnished, fitted out', whence a sb. with  
the sense 'erection, fortification' might perhaps arise.]

6. Old Law. *Benefit of (his) clergy*, also simply (*his*) *clergy*: orig. the privilege of exemption from trial by a secular court, allowed to or claimed by clergymen arraigned for felony; in later times the privilege of exemption from the sentence, which, in the case of certain offences, might be pleaded on his first conviction by every one who could read. Abolished, after various earlier modifications, in 1827. Cf. *NBOOK-VERSE*.

The ability to read, being originally merely the test of the 'clergy', or clerical position, of the accused, came at length to be in itself the ground of the privilege, so that the phrase became = 'benefit of scholarship' (sense 5, instead of 1).

**Cleric** (kle rik), *a.* and *sb.* [*ad. late L. cleric-us* clergyman, priest, prop. an adj. 'of or belonging to the *clerus*'; a. Gr. κληρικ-ός 'of or pertaining to an inheritance', in later (Christian) use 'of or belonging to the ecclesiastical or sacerdotal order', f. κληρος 'lot, allotment, piece of land, estate, heritage', used in 2nd c. as a name of the ministerial or sacerdotal order in the church, the clergy. The Greek words were adopted in Latin in this transferred sense only (*clerus* in Tertullian a 220, *clericus* in Jerome 4th c.), with which they passed into Romanic and English. Cf. *CLERK*.

On the history of the application of κληρος to the Christian ministry, see Ep. Lightfoot *Philippians* (1868) 245-6, where its probable origin is seen in the use of the word in Acts i. 17, τὸν κληρὸν τῆς διακονίας ταύτης 'the lot of this ministry'; cf. i. 25. In the time of Jerome, explanations were sought in the use of κληρος in Deut. xviii. 2, compared with ix. 29, and parallel passages; and i Peter v. 3 was interpreted in this sense. Jerome's explanation is thus repeated in the *Apology for the Lollards* (c. 1400) 43:

'The clerk... schuld interpret þe calling of his nam, and enforce to be þat he is seid; for a clerk in our speche is seid *sor*, and þer for are men seid *clerkis*, for þei are of þe Lordis sort, or for þe Lord is þer part; and for he is þe Lordis part, or hap þe Lord his part, he auþ[er] to haue him s[u]chlik þat he haue þe Lord, and be had of þe Lord.'

Fr. *clerc*, *clergue*, *clerge*, Sp. *clerigo*, It. *chierico*): see *CLERICO*. The original sense was 'man in a religious order, cleric, clergyman'. As the scholarship of the Middle Ages was practically limited to the clergy, and these performed all the writing, notarial, and secretarial work of the time, the name 'clerk' came to be equivalent to 'scholar', and specially applicable to a notary, secretary, recorder, accountant, or penman. The last has now come to be the ordinary sense, all the others being either archaic, historical, formal, or contextual.

The pronunciation klɜːrk is evidenced in the south of England from the 15th c.; cf. *bark*, *hark*, *dark*, etc., from earlier -*er*; also *serjeant*, *hearth*, *Cherwell*, *Hertford*, and the 15-17th c. *clargy*. The dialects, *esp.* the northern, have retained the *e*, as *Sc. clerk*, *klerk*. In U. S. the pronunciation is klɜːk, and of late this has become somewhat frequent in London and its neighbourhood.]

1. A man ordained to the ministry or service of the Christian Church; a churchman, clergyman, or ecclesiastic. (For greater distinction, *CLERICO* is now often substituted.)

*b.* Since the Reformation, in England generally = 'clerk in holy orders', i. e. a deacon, priest, or bishop. Now chiefly a legal or formal designation.

b. Hence, since the Reformation, applied to laymen who perform such of these offices as are retained in cathedrals, churches, or chapels. In the Prayer-book of 1549 the Clerks were the choir men; in later times, the Clerk, or Parish Clerk, is the lay officer of a parish church, who has charge of the church and precincts, and assists the clergyman in various parts of his duties, e.g. by leading the people in responses, assisting at baptisms, marriages, etc. In other senses, usually with some distinctive epithet, as *Bible Clerk*, a scholar who reads the Scripture lessons in some ancient college chapels; *Lay Clerk*, a singing man in some cathedrals and college chapels; *Singing Clerk*, etc.

cleever, 7-8 cleaver. [Early history obscure:

app. in local and colloquial use long before it became a general literary word. A single example of *cliver* is known in ME., but the word has not been found again till the 16th c., and it appears not to have been in general use till the close of the 17th, since Sir Thos. Browne specially mentions it as East Anglian, and Ray explains it among his dialect words. Outside Eng., Koolman gives Efris. *clifer* (from *clifer*), clever, skilful, alert, ready, nimble, and *klöver*, *klever* is used in same

sense at Ribe Stift in Jutland (Molbeck). The early example suggests relation to M.E. *clevers* 'claws, talons, clutches', in the sense 'nimble of claws, sharp to seize', and the 16-17th c. examples (also of *cleverly*) show it connected with the use of the hands, a notion which still remains in the general sense of *adroit*, *dexterous*, having 'the brain in the hand'. Cf. also *CLEVERUS*. *Clever* appears to have come into general use about the time that *deliver*, formerly used in the sense 'expert', became obsolete, but there is no trace of any influence of the one upon the other. The sense-development has analogies with that of *nimble*, *adroit*, *handy*, *handsome*, *nice*, *neat*, *clean*.

† 1. A belt of the earth's surface contained between two given parallels of latitude. *Obs.*

In early ages 7 climates were reckoned, supposed to be presided over by the 7 planets; of these, the central lines passed respectively through Merce 17°, Syene 24°, Alexandria 30°, Rhodes 36°, Rome 42°, Borysthènes 45°, and the Rhiphæan Mountains 48°. Later, the space between the equator and each of the polar circles was divided into 24 climates, each corresponding to an increase of half-an-hour in the length of the longest day. See Skeat, Note to Chaucer's *Astrolabe* ii. § 39.

**Climb** (kleim), *v.* Pa. t. and pp. *climbed* (kleim'd); arch. *clomb* (klō'm).

[OE. *climb-an*, *clamb* (clēmb), *clumbon*, *clumben*, corresp. to OHG. *clāmban*, MHG. *klīmben*, *klīmben*, MDu., MLG., Du., LG. *ger. klīmben* = WGer. \**klīmban*. Believed to be a nasalized form of OTeut. \**klīban* (see CLAVE v. 2), the *n* being perh. originally a characteristic of the present stem, which has been extended to the other parts, and has carried the vb. from the ablaut series of *i*, *ai*, *i*, into that of *im*, *am*, *um*. Hence the sense-development 'cleave, adhere to, get up by clinging or adhering'; for which cf. OE. *clifan* to cleave, cling, MDu. *cliven* to cleave, stick, also to climb, ON. *klifa* and ME. *cliven* to climb. In all the modern langs. the *b* is lost in pronunciation, and in most in spelling also; but in Eng., although *climbe*, *clime*, formerly prevailed, the spelling now recognized is *climb*. In most of the dialects the *i* is short, *clim*; but the standard language, like east midland and eastern, has the *i* long (kleim), the vowel being lengthened before *mb*, app. as before *nd* in *bind*, *find*, etc. (But clear evidence of the long vowel has not been found before the 16th c.)

The original strong inflexions also remain dialectally (notably in Sc. *clim*, *clamb*, *clum*), but in the south, weak forms appeared already in 13th c., and prevail in 16th c. prose; no others occur in Shaks. or in the Bible of 1611. But the Elizabethan archaists affected a pa. t. and pp. *clome*, *cloame*, *clōmbe*, which they appear to have taken from Chaucer or Lydgate, and mistakenly pronounced with long *ō*. (In the ME. *clōmbe*, *o* was either short, as a variant of *clamb*, or more usually a graphic expedient for *u* before *m*; and in the dialects in which *clom* has come down the *o* is short.) From Spenser and his contemporaries, *clōmb* passed into later poetry, and occasionally appears in prose, especially in writers familiar with the strong *clamb*, *clom*, or *clum* in dialect use.]

(From the ambiguity of the spelling it is often uncertain whether *climbe*, *clymb*, *climb*, *clyme*, in 15-16th c. meant (klīm) or (klēim), and whether *clōmb*, *e* in 16-17th c. meant (klōm) or (klōum).)

[Meaning and origin uncertain. The Glossary to first ed., professedly based on Spenser's authority, explains it as key-hole; for the word in such a sense no etymology is known, and the reference to *clicket* is quite erroneous. Some identify the word with Du. *klink*, Ger. and Da. *klinke*, Sw. *klinka*, (also Fr. *clincle*, *clenche*) 'latch of a door'. Cf. also 'clink', a small or fine crack. *Adv. *Clink* (klink), v.<sup>1</sup> Forms: 4 klynk(e, 4-6 clynk(e, 6-7 clinck(e, 6 clynke, 6-clink. [A weak vb. found, with the sb. of same form, only from 14th c. Du. has a strong vb. of identical form, *klinken* (MDu. *klincken* and *klingeren*) 'to sound, clink, ring, tinkle', for which H.G. has the str. *klingen*, OHG. *chlingan*, LG. *klingen*, EFr. *klengen* (*klung*, *klungen*) 'to ring, sound', and *klinken* (*klunk*, *klunken*) 'to clink glasses', WFr. *klincien*, *klincien*. Also Sw. *klunga* str. (OSw. also *klunga*, *klunka* weak), Da. *klunge* str. 'to sound, ring', *klunke* 'to clink glasses'. Thus there appears a double stem-form, *klung*-, *klunk*-, evidently (like the Lat. and Gr. words cited under CLANG) of echoic origin; one of these forms was prob. a later modification (? perhaps expressing a variety of sound); the evidence appears to favour the priority of *klung*-. No trace of either form has yet been found in OE. (where there is a strong vb. *clingan* in an entirely different sense: see CLING v.), and thus we cannot tell whether ME. *clinken* went back with the Du. to an OLG. *\*klinkean*, or was of later adoption or origination in England. Cf.

the still later CLANK, and its correspondence with Du. *klank*. The sense-development is greatly parallel to that of *clank*; the transition from sound to sudden action is a common one, esp. in Sc.; cf. *bang*, *boom*, *bum*, *chop*, *clank*, *clap*, *pop*, etc. (Rare by-forms are *clenk*, *clunch*, *cling*.)

Some of these may be compared with the corresponding use of CLANK v. 6, *clink down* being a sharper and less noisy act than *clank down*; but in most there seems to be an instinctive association with CLICK, CLUTCH, to *clink away*, *clink up*, being to *click away* or *up*, with a sudden and deft action.

**Clock**, sb.<sup>1</sup> Forms: (1) cluoge, 4-5 clok, clokke, clocke, 6 klokke, 6—clock. [OE. *clucge* (or *clucge*) is found only once, and has no historical connexion with the extant word which goes back app. only to the 13-14th c. ME. *clōche*, *clōcke*, was either a. MDu. *clōcke* (mod. Du. *klok* 'bell, clock'), or a. ONF. *clōke, cloque* = Central Fr. *cloche* 'bell'. The Du. is cognate with OFris. *klōka, klokke*, Efris. *klōkke, klok*, MLG. *klokke*, LG. *klōkke, klokke, klok*, OHG. *glocka, klocca, glogga*, MHG. *glocke, klokke, glogge*, Ger. *glocke* 'bell', ON. *klōka*, later *klukka* 'bell', Norw. *klōkka, klukka*, Sw. *klocka*, Da. *klokke* 'bell, clock'. The French *cloque, cloche*, with Pr. *clōca, clocha*, Piedm. *cioca*, descends directly from late L. *clōc(c)a* (8th c.). In all the prec., as in OE. *clucge*, the word is fem.; but in Celtic, OIr. *clōc* (genit. *clōic*—\**clōic*), Irish *clag*, Gael. *clag* (genit. and pl. *cluig*), Corn. *clōch*, Bret. *clōc'h*, 'bell', are masc.; only Welsh *clōch* is fem., and its pl. *clych* points perh. to an earlier masc. Known since about 8th c. in Merovingian L., in Celtic, and in Teutonic; early diffusion app. connected with that of Christianity in western and northern Europe; not found in the southern Romanic langs. where *campana* is the word for 'bell'. Locality of origin undetermined: some refer it, on historical considerations, to Celtic; some think it possibly connected with OHG. *clōcch*, *clōchch*, MHG. *clōcken* 'to strike, knock'; but the variant forms in OHG. point rather to its being foreign. Wherever it actually arose, it was prob. echoic, imitating the rattling made by the early handbells of sheet-iron and quadrilateral shape, rather than the ringing of the cast circular bell of later date. The relation of the rare OE. *clucge* to the other forms, which agree generally with the types *klōk, klokke*, is obscure.

For the original and general sense of this word in the other langs., English had the word **BELL** in regular use; it is probable, therefore, that *clock* was introduced either with striking clocks, or at least with bells on which the hours

were mechanically struck; it was prob. never prevalent in ME. in the mere sense 'bell'.

† 1. A bell (the sense of OE. *clucge*; in ME. prob. only as a retention of the Fr. use). *Later*, the gong of a striking watch. *Obs.*

[c. 890 K. ALFRED *Bada* v. xxiii., Hleofor heora clucgan (v. r. cluccan). 1483 *Caxton Gold. L.* 281/4 The clockes of Saynt Steuen... had a merueylous swetenes in theyr sowne. 1664 *POWER Exp. Philos.* 193 And perchance hears the Clock and Alarm strike in it [a Watch]. [c. 1725 *Lond. Gas.* No. 5307/3 A Gold striking Pendulum Clock Watch.]

2. An instrument for the measurement of time; properly, one in which the hours, and sometimes lesser divisions, are sounded by strokes of a hammer on a bell or similar resonant body; but many clocks now do not strike. The mechanism consists of a train of wheels set in motion by weights or a spring, actuating and regulated by a pendulum or balance-wheel, and requiring to be periodically wound up; the passage of hours, minutes, etc., is indicated by 'hands' or pointers, on a 'face' or dial-plate.

**Cloff (klōf).** *Commerce.* Also *erron. clough*. [Origin obscure. Identity with CLOWE, the weight, has been suggested. Cf. also CLEF.] An allowance (now of 2 lbs. in 3 cwt., or 1½), given with certain commodities, in order that the weight may hold good when they are sold by retail.

According to Grafton, 1568, cloff was the grocer's name for the fixed allowance made to the buyer in lieu of the variable advantage which he formerly had through the inclination in his favour of the King's Beam, a practice abolished in 1269. (See also the *Ordinance of Staples*, 1353, c. 10.) But there is a long gap between 1269 and 1502, when our quotations begin. Fabyan, whom Grafton copies verbatim for his text, has no mention of *clōff*.

**Close** (klōz), *v.* Forms: a. 1 clysan, 3 clus-en; B. 3- close, (4 close, 5 cloose, 7 cloze, north. 5-6 cloyse, 6 clooise, clois(s)). [M.E. *close-n* (13th c.), a. OF. *close* stem (*close* pres. subj.) of *clorre* :- L. *claudere* to shut, close. OE. had already the vb. *clys-an*, f. *clys(e)*, a. late L. *clūsa* = *clausa* 'shut or enclosed place'. This came down to 13th c. in form *cluse-n* (i), and probably *close-n* was at first viewed simply as a frenchified pronunciation of this earlier word: cf. *clūsen*, BEOLSE.

In French *clorre* is of little importance, having been almost superseded by *fermer* :- L. *firmare*, to make firm or fast, to fasten. In English, on the other hand, *close* and its accompanying adj. and sbs. have become great and important words, developing whole groups of senses unknown to French.]

I. To stop an opening; to shut; to cover in. 1. *trans.* To stop up (an opening or channel) so that it ceases to be open or to allow of passage. Where the opening is provided with a gate, door, or lid, turning on hinges or sliding, to 'shut' this is to close the opening; hence 'close' and 'shut' become to a certain extent synonymous, as in 'shut' or 'close the door, the eyelid', etc.

*Close* is, however, a more general word, to *shut* being properly only a way of closing; hence the former is generally used when the notion is that of the resulting state, rather than the process.

b. In reference to places, *close* usually means that access to them is officially stopped for the time, as 'the Bodleian Library is closed for a week', 'the grounds are closed to the public'. Unknown in OS., OHG., and Gothic; its general diffusion through the German dialects appears to date about the middle of the 12th c. The ON. form *klēdi* (whence Norw. and Da. *klæde*, Sw. *klæde*) does not correspond in vowel or ending to the WGer. (which would require *klēid* in ON.); its history is obscure. Beside OE. *clāp*, which was the source alike of midl. and south. *cloth*, *clothes*, and north. *clath*, *clayth*, pl. *clathis*, *claise*, a form *clēp* is recorded once (see 1 below); if genuine (which is doubtful), this may be the source of the north. ME. *clēth*, *clēthis*, *clēse*, which have otherwise been referred to a Norse origin.

The original pl. *clāthas*, is directly represented by the existing *CLOTHES*, q. v.; this (*klōthas*) is now restricted to the sense 'garments'; for other senses, *cloths* has gradually come into use since c 1600, though the complete differentiation of *clothes* and *cloths* belongs to the 19th c., *clothes* being a pie-valent spelling of both in the 18th c. The pronunciation of *cloths* varies: northerners generally say *klōps*, or *klōps*; Londoners usually *klōps*, esp. in senses 1-8, though some reduce it to *-klōps* in combination, as in *table-cloths*, *neck-cloths*; many would say *klōps*, or *klōps*, meaning 'kinds of cloth' (see II).

The etymology and even the primary sense of O.Tent. \**klaip* are uncertain. The former is prob. to be sought in the Teut. vb. stem *klā*-, *klāt*-, to stick (CLAY, CLEAN, CLEAM), but whether the name was applied to cloth as a substance felted or made to stick together, or to a cloth as a thing to be attached or made to cling to the body, is doubtful. The earliest known uses of OE. *clāp* are not for the material (a sense hardly evidenced in OE.), but for 'a cloth' as a thing to wrap or wind about the body; from this primitive rudiment of attire, we pass naturally on the one hand to the more fully developed 'clothes' or garments, and on the other to the material of which all such articles are composed.]

A name given, in the most general sense, to every pliant fabric woven, felted, or otherwise formed, of any animal or vegetable (or even mineral) filament, as of wool, hair, silk, the fibres of hemp, flax, cotton, asbestos, spun glass, wire, etc. But when used without qualification or contextual specification, usually understood to mean a woollen fabric such as is used for wearing apparel. *Clothe* (klōð), v. Pa. t. and pa. pple. clothed (klōðd), clad (klæd). Forms: a. 1 clāðian, 2–4 clape-n, 3 cloðe-n, (clopi), 3–4 clope-n, 4 cloope, (clode), 5–8 cloth, (6 clote), 6–9 cloath, -e, 4–clotha. Also north. 3–5 clath(e), 6–9 Sc. clath, clath. Pa. t. and pple. 3– clothed, (north. clathed, etc.). β. (1 clāðan); Pa. t. 4–5 cladd(e), 3– clad; Pa. pple. 4– clad, 4–6 cladd-e, 5–6 clade, 6 yoladd, 6–9 yolad, (7 clod). Forms with e, see CLEAD. [There are two types of this verb, both rare in OE.; a. OE. *clāðian*, of which the pa. pple. *geclāðed* for *gecladd(e)*, -od occurs. Hence ME. *clāthe*, *clothe* (the former retained in north dial.), inflected *clathed*, *clathed*. β. OE. *clēðan*, with pa. t. *clēdde*, \**clædde*, whence ME. *cladde*, *clad*, and prob. the northern type *clēthe*, *clēde*, *clad* (formerly referred to Norse *kleða*): see CLEAD. The former belongs to a type \**klaipþan*-, the latter to \**klaipþan*, both f. \**klaipþan* (or ? *klaipþan*)- a CLOTH. Cf. MHG. and mod. G. *kleiden*, LG., Du. *kleden*, EFris. *kleden*. ON. had *kleða*, going with the ON. form of the sb. *kleði*. Both forms of the pa. t. and pple. have come

down to modern use. *Clod*, occas. found in 16-17th c. was either a late shortening of *cloth'd*, *cloth'd*, or a mixture of these with *clad*. The form *yclad*, very rare in M.E., was revived by the Elizabethan archaists, after whom it has become a 'Spenserian' form in later poets.]

Also 5-6 (*dial.*) -9 *close*, (5 *cloysse*, 6 *cloose*, 7-8 *cloes*; 5 *north.* *clase*, *Sc.* 6 *clais*, 8 *clayis*, 8-9 *claise*, *CLASES*; also 4-5 *clathis*, *clase*. [The original plural of **CLOTH**:-OE. *clā-thas*, ME. *clō-thes*; the *ō* remain-

ing in the (originally) open syllable, and the *y* becoming *ē* between vowels, as in *clothe* vb., *clothing*, etc., and subsequently changing final *s* to *z*: cf. *truth*, *truths*, *staff*, *staves*, etc. As the singular *cloth* is not now used in the sense of 'a garment', and has received a new plural *cloths* for its extant sense, *clothes* remains a collective plural, without a singular; to express the latter, a phrase, such as 'article of clothing', or another word, such as 'garment', is used.

The distinction *cloths*, *clothes*, is chiefly of the 19th c. The ordinary 18th c. spelling was *cloaths* (pronounced with *ð*), as in *cloath*=*CLOTTIE* vb.

Almost immediately after the reduction of the M.E. dissyllabic form to one syllable, by change of -es to -s, the *ð* began to disappear in pronunciation in all the dialect types, as shown by the spellings *close*, *cloes*, etc. (from *clothes*), *clase*, *claise*, *clases*, etc. (from north. *clathes*), *clise* (from *clithes*). These forms are still dialectal, and *close* (klōz) is frequent as a vulgar or careless pronunciation of *clothes*. All these phenomena are paralleled in other Germanic dialects, e.g. MHG. *kleit*, pl. *kleider*, MDu. *clact*, pl. *clide*, EFr. *clide*, pl. *clier* (for *clider*), WFr. *clade*, pl. *clian*, NFr. *claid*, pl. *clie*, Saterland *klath*, pl. *klider*, Wangeroo *klit*, pl. *klider*.

The phonetic history and dialect forms clearly show that it is parallel to *ough*, *enough*, *plough*, *tough*, etc., from OE. *-sh*. The OE. points to an OTeut. \**klūtō*-, pre-Teut. type \**glūdō*-s from same root as *CLOT*, *CLEAT* (-\**glūdōm*, \**glau*-dom). The original sense would therefore be something like 'lump, piece of stuff'; from an early period the word has been applied especially to a patch or piece of cloth, and so to a cloth (CLOTH I-3) in a somewhat depreciatory sense. But sense 2 retains some of the original wider meaning, and relationship with *CLEAT*. It has been doubted whether sense 7 belongs to this word, though a parallel development of sense is found under *CLOW*.]

The OE. *chlūs*, *chlise*, is recorded in the senses 'enclosure', 'narrow pass', but not in that of 'dam', 'lock', or 'sluice', though 'dam' appears already in Ancræn Riwle in 13th c. In the 18th c. *clow* began to be erroneously spelt *clough*, by engineers, etc., either through erroneous identification with *clough* sb. 'ravine', or by association with *plow*, *plough*. In some of the dialect glossaries it is spelt *clow*, meaning *klus*. An unexplained *clowre*, *cloor*, is found in Catholicon Anglicum, and northern dialects.

A compound of L. *clūs* was *exclūs* (in Gregory of Tours; in med. L. *clūs*, *slūs*), giving OF. *excluse*, F. *cluse*. Hence Sc. Cluss, *clush*; OF. gave MDu. *thuyse*, Du. *sluys*, whence Eng. *sluice*, LG. *sluise*, Ger. *schleuse*. Thus *clous* and *sluice* are ultimately closely related.]

*Clown* (klaun), sb. Also 6 cloune, cloine, cloyne. [Appears in Eng. in second half of 16th c. as *cloune* or *cloine*, and *clowne*. The phonetic relation between these is difficult to understand; the former is esp. obscure: possibly a dialect form. By Dunbar, the word (if indeed the same) is written *cloun*; but it times with *tone*, *Joun*, meaning *tune*, *June*, both having in Sc. the sound *i* (or *ø*), which would imply (klus). Words identical or closely related appear in several of the cognate langs. and dialects: e.g. NFris. (Moringier dial.) *klonne* (or *klunne*) 'clumsy lout, lumpish fellow' (Bendsen);—OFris. type *\*klunda* wk. masc. Cf. NFris. insular dial. Amrum *klunij* (pl. *klunjar*) 'clod, clut, lump' = Sylt *klund* 'clog, wooden mall';—OFris. type *\*klund* str. masc. Also mod. Icel. *klunni*:—*\*klunji* 'clumsy boorish fellow' (Vigf.), 'en klods, ubhændig person' (Jonson), compared with Sw. dial. *klunn*, *kluns* (Rietz) 'clump, clog, log', and Da. dial. *klunds*=*klods* 'block, log, stump', also 'clown'. In Dutch also, Sewall (1766) has *kleun* fem. (marked as a 'low word') 'a hoidon or lusty bouncing girl', *kloen* n. with same sense; and he explains Eng. *clown* as 'een plompe boer, kinkel, kloen'. *Bilderlijk Verklarende Geslachtlijst* (1832) says that *kloen* applied to a man signifies *een lomper*, 'clown' in English, and so is it with *klont*, *kluit*, and *kluts* or *klots*, all meaning primarily 'clod, clut, lump'. So far as concerns the sense-development, then, it is clear that we have here a word meaning originally 'clod, clut, lump', which like these words themselves (see CLOD 5, CLOUT 4), has been applied in various langs. to a clumsy boor, a lout. Of an OE. type, corresp. to the Fris., or to the Du. words, we have no trace, no more than of the occurrence in Eng. of the primitive sense 'clod'; and it is probable that in Eng. the word is of later introduction from some Low German source.]

III. A combination, association.

[This group of senses is closely connected with the vb; but the evidence does not make certain what was the exact course of development. In particular, it does not appear whether a club in senses 13-15 was, in its origin, merely a knot or association of persons, or a 'clubbing' of the expenses of an entertainment, or of contributions towards it: see the verb senses 4-10, where the earliest example quoted (in 9) is connected with the joint defrayal of expenses. The order here followed is therefore merely provisional.]

† 11. A meeting or assembly at a tavern, etc., for social intercourse; a social meeting the expenses of which are jointly defrayed; later, a periodical social meeting of such an association as is described in 13 (to which the name club was soon transferred). *Obs.* (Johnson's explanation 'An assembly of good fellows, meeting under certain conditions', belongs here, unless 'assembly' was meant for 'association'.)

13. An association or society of persons of like sympathies, of a common vocation, or otherwise mutually acceptable, meeting periodically (under certain regulations) at some house of entertainment, for social intercourse and cooperation.

As to 'clubs' in this sense, which were a great feature of English life in the 18th c., see the *Spectator* 1711 No. 9. Associations of this sort still exist under the name; but, speaking generally, the 17-18th c. 'club' has developed in two directions; that mainly connected with entertainment having become a permanent institution as described in sense 15, while the occasionally or periodically meeting club has usually primary objects apart from conviviality, as in 14. (The first quotation may belong to sense 12.)

1670 *COLLINS in Rigaud Corr. Sc. Men* (1841) II. 526 Of two mathematical clubs here, one is a large one consisting of divers ingenious mechanics, gaugers, carpenters. c. 1690 B. E. *Dict. Cant. W. HOLMES in *Molloy's Lett.* II. 10 Oct., What a fine thing it would be to see you back at the Saturday Club again.

14. An association formed to combine the operations of persons interested in the promotion or prosecution of some object; the purpose is often indicated in the title, as *Alpine, Athletic, Chess, Cricket, Football, Literary, Natural History Field, Tennis, Yacht Club*, etc.; *Benefit, Clothing, Coal, Goose Club*, etc.

Many of these are solely devoted to the object for which they are organized; others combine therewith some of the convivial features of sense 13, or even the permanent organization of sense 15. Here belong the publishing clubs, as the Abbotsford, Bannatyne, Roxburgh, Spalding, etc., which differ from *societies* with similar objects chiefly in their limitation of membership to a fixed number.

Rev.* 2 The solemn public seal of sanction they have received from two clubs of gentlemen in London, called the Constitutional Society, and the Revolution Society. 1822 *EXAM.* 11 May 207, The benefit club..forms something of a provision against adversity. 1859 [JOHN BALL] *Peaks, Passes & Gl.* 1st Ser. vii, Early in the year 1858, it was resolved to give scope for the extension of this mutual feeling amongst all who have explored high mountain regions, by the formation of the Alpine Club. 1887 *MISS BRADDON Like & Unlike* x, St. Austell had got the commoner into the Jockey Club. 1890 *Times* (weekly ed.) 3 Jan. 15/3 Her Majesty contributes £700 annually to the funds of the Royal Clothing Club at Windsor.

b. Short for *BENEFIT CLUB. colloq.* (Cf. *club-feast*, *-money* in 20.) To be on the Club: to receive relief from its funds.

15. An association of persons (admittance into which is usually guarded by ballot), formed mainly for social purposes, and having a building (or part of one) appropriated to the exclusive use of the members, and always open to them as a place of resort, or, in some cases, of temporary residence; the club may be political, literary, military, etc., according to the aims and occupations of its members, but its main feature is to provide a place of resort, social intercourse, and entertainment.

This is a natural development of the club of sense 13, which gradually grew till it monopolized the whole accommodation of the tavern or house at which it met, and the place became known as a 'club-house',—the club often bearing the name of the proprietor of the house. Later, in order to have the management of the house and their affairs in their own hands, some clubs started fully-equipped establishments of their own. The institution has developed into its most completely-organized form in London, where, especially in the vicinity of St. James's (colloquially called 'clubland'), are to be found the most perfect types of it.

1776 *WALPOLE Jernl. Reign Geo. III* (1850) II. 39 Being excluded from the fashionable club of young men at Almack's they formed a plan for a new club. They built a magnificent house in St. James's Street and furnished it gorgeously. 1823 *BYRON Let. Ld. OE. *clympe*, CLUMPER. There is no evidence to show whether the English goes back with these to OLG, or WGer., or is of later adoption from L.G. The stem *klump-* appears in ON. with another grade of the labial as *klumb-*, whence *klumba*, *klubba*, CLUB.

In sense 4 it is immediately derived from MDu. and MLG. *clumpe*, *klumpe*, Du. *klomp* a wooden

shoe, i.e. a shoe entirely shaped out of a lump of wood (as worn by the North German peasantry); which is a special application of the Du. and LG. word as given above. Although, therefore, this use has not been developed in English from the radical sense, it may be treated as belonging to the same word, esp. as there is a general association of meaning: cf. also CLUMP v.

*Klump* was probably a nasalized form of \**klub*; comparing this with the stem *klub* of OHG. *choho*, OLG. *kolha* (MLG. and MDu. *colve*, Du. *kolf* 'club'), and ON. *kolfr* javelin, *kyfja*, *kyfja* 'knot, club', we are led to a pre-Teut. \**klbh*, whence app. L. *globus* rounded mass, ball.]

[A word, or train of words, of difficult history. The earliest form exemplified is *ME. clōke*, *Sc. clūke*, of which the normal modern form would be *clouk*. Of this, *ME. clōche*, 17th c. *clouch* (rime *brooch*), appears to be a palatalized southern form; but the conditions of the origin of this and *cloutch*, *clouch* (rime *pouch*), are obscure. *Clutch*, which since the 17th c. has superseded the other forms (exc. dial. *cluke*, *clouk*, *clūke*), came in apparently from the verb *CLUTCH*, *q.v.* It is to be noticed that with the obsolescence of the earlier forms, the original literal sense of 'claw' also disappeared, and the senses now in use are mainly those of a noun of action from the verb.

For *ME. clōke*, normally we should expect an OE. \**clūc*, *clūce*. But, as under *Brook* *v.* we see a *ME. broke* (beside *brōuk*), from OE. *brīcan*, so here, *ME. clōke* (?beside \**clūke*) may represent an OE. \**clūc* or *clūce*. This would represent an OTeut. \**klūk* or *klūkōn*, a deriv. of the vb. root \**klūk*, *klēnk*, whence came \**klūkjan*, OE. *cluccjan*, *CLITCH*, *CLUTCH*. Thus *clōke* would be ultimately related to these verbs. As we cannot on any phonetic principles explain the palatalized forms *clōche*, *clouch*, *clutch*, it seems probable that these were produced by the influence of the vb. *clucke*, *clutch*, upon the *sb. clōke*, \**clūke*, and that the *sb.* was thus brought gradually in form and sense into direct identification with the verb, as we see, under the verb, that the latter has also been brought in sense into closer association with the *sb.*]

**Co**, dial. form of COME *v.*

**Co-**, prefix of Latin origin. In Latin the preposition *com-* (which as a separate word was written in classical L. *cum*) was shortened to *co-* before vowels and *h*, also before *gn-*, e.g. *coalescere*, *coercere*, *coortus*, *coherere*, *cognatus*. Partly from the greater syllabic distinctness of this form of the prefix, arising out of the natural break between it and the following vowel, whereby also, on the break-down of the older quantitative system, the *o* became a long vowel, partly from the readiness with which some compounds of this type, as *co-aquālis*, *co-adjutor*, *co-episcopus*, *co-hæres*, *co-opérator*, *co-opérare*, were analysed into their elements, *co-* has come in English to be a living formative, the use of which is no longer restricted to words beginning with a vowel, but extended to all words of analogous kinds, including native English or other words, as well as those from Latin. The general sense is 'together', 'in company', 'in common', 'joint', 'ly', 'equal', 'ly', 'reciprocally', 'mutually'. It combines (like L. *com-*, *con-*, *co-*) with verbs, adjs., adverbs, and sbs. It is sometimes prefixed to words of L. origin which are already compounded with *com-* (*con-*), as *co-con-nexion*, *co-conspirator*, *co-constituent*.

It occurs also as a variant form of words of L. origin or type, where the regular form is *com-*, *con-*, *cor-*: e.g. *co-centric*, *co-natural*, *co-numerary*, *co-partiment*, *co-relation*, *co-rival*, *co-temporary*, *co-terminous*, and other occasional instances: cf. also *co-citizen*, *co-join*, *co-mingle*, with *con-citizen*, *con-join*, *con-mingle*, etc.

All the more important of these compounds appear in their alphabetical order as Main words: there follow here examples of compounds of rare occurrence and obvious meaning, or in which the combination is but for the nonce. It is notable how many of these are solely due to Bishop Ken.

[In 16th c. *coche*, a. F. *coche* (masc., in 16th c.  
occas. fem.). Found since 16th c. in nearly all  
European langs.: cf. Sp. and Pg. *coche*, It. *cocchio*,  
Wallachian *cocie*; Ger. *kutsche* (in 16th c. also  
*kotsche*), Du. *kots*; Boh. *koč*, Pol. *koc*, etc. All  
originally from Magyar *kocsi*, formerly also  
written *kotsi*, (pronounced kotsfi), 'ungaricum  
currum [quem] kotczi vulgo vocant' (anno 1560),  
used in Hungary from the reign of King Matthias  
Corvinus, 1458-90. *Kocsi* is in form an adjective,  
meaning app. 'of Kocs (kots)' a place south of  
Komorn, between Raab and Buda; the full  
original name (still used in 18th century) being  
*kocsi szekér* i. e. 'Kocs cart' (car, wagon), ren-  
dered in Lat. in 1499 *cocius currus*, in 1526  
*currus kocsi*. Hence, also, the early equivalents  
in other langs.: Boh. *kočl vřs* (Kotsh car), short-  
ened to *kočl*, *koč*; Ger. 16th c. *cotschie* or *cotschy*  
*wagen*, *cotsie wagen*, *gotschiwagen*, *gutschwägen*,  
shortened to *gotschi*, *gutschi*, *gutsche*, *kutsche*,  
*kutsche*; earlier Du. *kotsie*, *kotsie*, *koets*-*waghen*,

shortened to *kotsie* (Kilian), *koetsie*, *koets*. Cf. also 16th c. Eng. *cochee*. The Sp., Pg. and F. *coche*, were app. immediately from 16th c. Ger. *kotsche*. See full historical details collected by Hildebrand in Grimm, s.v. *Kutsche*.]

1. A large kind of carriage: in 16th and 17th centuries, usually a state carriage of royalty or people of quality (still occasionally used, as e.g. the Lord Mayor's coach); now, usually, a large close carriage with four wheels, with seats inside, and several outside, used for public conveyance of passengers (see STAGE-COACH). Hence to *take a coach* (obs.).

It does not appear certain what was the precise new feature that distinguished the Hungarian *koetsi*, and led to its adoption throughout Europe. A German picture of 'ein ungerische gutsche', after 1550, shows it still without covering, and not suspended on springs. (Hildebrand in Grimm.)

Coarse (kō's), a. Forms: 5 coars, coarse, 6 coours, cowrse, (cowarce), 6-8 course, 7 coorse, 7- coarse. [First found early in 15th c. No corresp. adj. in Teutonic, Romanic, or Celtic. The general spelling down to the 18th c. was identical with that of the sb. COURSE; with that word it is still identical in pronunciation, both in standard English and in the dialects (e.g. Scotch *kurs*); the spelling *coarse* appears to have come in about the time when the pronunciation of *course* changed from *u*, *u*, to *o*, *o*. Hence the suggestion of Wedgwood that *coarse* is really an adj. use of *course*, with the sense 'ordinary', as in the expression of *course*, 'of the usual order'. It appears to have been used first in reference to cloth, to distinguish that made or worn in ordinary course from fine cloth or clothes for special occasions or special

persons; 'course cloth' would thus be 'cloth of (ordinary) course'. Cf. the history of *mean*, and such expressions as 'a very ordinary-looking woman', 'a plain person'.

Our first contemporary example of the spelling *coarse* is in Walton 1653 (where *course* however also occurs); it became frequent after 1700; *course* occurs occasionally down to 1800.]

**Cob** (kɒb), *sb.* Also 5-6 cobble. [Used in a number of senses having but little apparent connexion with each other, and possibly of diverse origin. The notions may be roughly distinguished of 'something big or stout', 'something rounded or forming a roundish lump', 'a head or top'; but these are intricately interwoven in individual senses. Thus *cob* = 'cob-nut', can hardly be separated from the notion of 'stout or big nut' on the one hand, or from that of 'fruit stone' on the other. So sense 1 appears sometimes to mean 'man at the top'.]

It has been suggested that 'rounded head' is the radical notion, and that *cob* is a variant of *Cor*; but the history of the latter does not favour this. In some of the senses under II, *cobbie*, *cobyll*, was an earlier equivalent, but these senses are closely connected with others which have no equivalents in *cobbie*.]

**Cock** (kōk), sb. 1. Forms: 1-3 COO, 1 kok, COOO, 4-6 COO, COO, 4-5 COOKE, 5 COOK, COOKE, 5-7 COOKE, 4- COCK. [OE. *cocc*, *coc*, *kok*; cf. ON. *kokkr* (rare, according to Vigfusson only once in Edda), and F. *cog* (13th c. in Littré).]

Though at home in English and French, not the general name either in Teutonic or Romanic; the latter has derivatives of L. *gallus*, the former of OT. *\*kanon* : Goth. *hana*, OS. and OHG. *hano*, MDu. *hane*, Du. *haan*, MHG. *han*, Ger. *hahn*, ON. *hann*, Sw. *Da. hane*, OE. *hana* which scarcely survived into ME. Phonetically, it is possible that *coc* is: OT. *\*kukko*, from same root as CHICKEN (*\*kukino*) viz. *\*kuk*, *kuk*. But its frequent early spelling in OE. with *h* (*hok*, *kokke*, etc., 4 times out of 5 in *Gregory's Past*) looks rather as if it were considered foreign; for *h* is rare, except in foreign words. Also its use in one (later mixed) text of the *Salic Law*, vii. 6 (MSS. of 9th c.), 'si quis coccum aut gallinam furaverit' where other MSS. have *gallum*, and the Malberg glosses have *annas*, *cannas* for *channas*=original Teut. *han*, rather favours its being Romanic. In any case, this shows *coccus* in the Latin of Northern Gaul, a century before the earliest known English instances. (Kilian 1577 has in Du. 'kocke vetus = haen', but the status of this is uncertain.) Wherever the name arose, it was prob. echoic: cf. sense 4.)

IV. Technical applications. [The connexion of some of these with this word is doubtful.]

12. A spout or short pipe serving as a channel for passing liquids through, and having an appliance for regulating or stopping the flow; a tap.

The origin of the name in this sense is not very clear: the resemblance of some stop-cocks to a cock's head with its comb, readily suggests itself; but some of the earlier quotations seem to imply that the power of closing the 'cock' was no essential feature, i. e. that a cock was not necessarily a stop-cock, but that the word simply meant a short spout for the emission of fluid; in others it appears to be = nozzle or mouthpiece. But in German, *hahn* has been used in the same sense for an equally long period, and an example of 1503 in Grimm has 'wenn es (ein kind) einen hân ufgewint, so louft der wein aller aus' (if the child turns a cock, all the wine runs out), clearly referring to a stop-cock.

In the *Dictionnaire du Patois Normand, département de l'Eure* (1899) it is said, haycocks are generally called *vil-lottes*; but about Berville (a little south of Rouen) a *villette* of the smallest size, in which the hay is put up the first day, is called *une coque*, from its resemblance to the rounded shape of an egg-shell (*coque*). [**Cock**, sb.<sup>9</sup> Johnson (copied in later Dicts.) has the sense 'The notch of an arrow', which he probably found in Ainsworth's *The-saurus* (1746-) 'The cock of an arrow, *Sagittæ crena*'. No evidence has been found for such a sense: it appears to be an etymological figment founded on Skinner's conjecture that 'cock of a gun' (COCK sb.<sup>1</sup> 13) was a term originally proper to Archery, and identical with *It. cocca* 'the notch of an arrow' (Florio).]

**Cock** (kpk), v.<sup>1</sup> Formerly also cockke. [Here are included a number of separate uses, which appear all to be derived, in one way or another, from the name of the fowl. † **Cockagrice**, *Obs.* [*f.* COCK + GRICE *pig*.]

In early cookery, a dish consisting of an old cock and a pig boiled and roasted together. Also called *cockentrice*, *cokeyntrice*, *-tryche*, *app.* perversions of the word.

**Cock-a-hoop**. Also 6-7 *cock on (the) hoopo*, (*hoop*, *houpo*), 7 *cock in hoopo*, 9 *cock-a-whoop*. [A phrase of doubtful origin, the history of which has been further obscured by subsequent attempts, explicit or implicit to analyse it.

Blount, *Glossographia* (1670), says 'Cock-on-hoop'; our Ancestors call'd that the Cock which we call a Spigget; or perhaps they used such Cocks in their vessels, as are still retained in water-pipes; the Cock being taken out, and laid on the hoop of the vessel, they used to drink up the ale as it ran out without intermission (in Staffordshire, now call'd Strunning a barrel of Ale) and then they were *Cock-on-Hoop*, i. e. at the height of mirth and jollity; a saying still retained'. This account fits the use of the phrase in the 16th c.; but it has more the appearance of an inference from the phrase itself, than of an independent statement of historical facts. For we have no clear evidence that 'cock' ever meant a spigot, and even if it did, the use of the 'hoop' of the cask as a place on which to lay it, seems to require further elucidation. The matter is perplexed by the occurrence of a 'hoop' and of figures 'on the Hoop' in tavern-signs from a much earlier date. Thus the 'George on the Hoop' is said by Hotten and Larwood *Hist. Signboards* (ed. 5) 503, to be mentioned in Clause-Roll 43 Edw. III., and later are found the 'Hart', 'Swan', 'Eagle', 'Falcon', 'Cock', 'Hen', 'on the Hoop', also the 'Crown', 'Bunch of Grapes', 'Mitre', 'Angel', 'Bell', each 'on the Hoop'. Some of these signs still exist; but it is difficult to see what bearing they have on the phrase as originally used, or how the 'Cock on the Hoop' as a sign should have given rise to a phrase, more than any of the other devices similarly found 'on the Hoop'; still more it is difficult to imagine how this cock could be set on or taken off the 'Hoop' in connexion with a drinking bout. Equal difficulty attends various other suggested explanations of 'hoop', none of which affords the slightest clue to the 16th c. use.

Since the 17th c. 'cock' has been generally identified with the live fowl, which has led to changes both in the grammatical construction and use of the phrase; in accordance with this also, 'hoop' has been vaguely referred to F. *huppe* tufted crest, (a guess of Phillips), and identified with 'whoop', as in *war-whoop*; these are merely popular etymologies, but they have affected the use of *cock-a-hoop* by persons who believed in them. The following passages illustrate these remarks.

1403 *Add. Charter* 5313 Br. Mus., A messuage called 'the belle on the hoop'. 1631 *Deed* (in J. Coleman's *Book Catalogue* 1889) relating to 'two Inns in Shoreditch, one called the Cock and Hoop, and the other the Holy Lambe'. a 1637 B. JONSON *Eng. All upon the Spur, high in mirth, or standing upon high terms. 1793 W. ROBERTS *Looker-on* (1794) II. 73 No. 39 The Cock on the Hoop may be seen also in Holborn, printed on a board.]

The Romanic word must have originated in some fabulous geographical notion. Its derivation has been much discussed, but remains obscure: see Diez and Littré. Grimm suggested connexion with Ger. *kuchen* cake, 'because the houses there were covered with cakes'; cf. quot. 1305. Diez would connect it with Romanic words meaning 'cake', or with some derivative of L. *coquere* to cook, in which Littré and Scheler agree. [ME. *cocatrice*, -ice, a. OF. *cocatrix* (also *coc-, coqu-, kok-, cauc-, chocatrix*, -atris, -atris, *caucati*, *cocatrix*, *qualquatrix*) masc., corresp. to Pr. *calcatris*, It. *calcatrice* (1266) fem., repr. L. \**calcatris*, *calcatricem* (cf. *caucatrices*, in *Du Cange*), app. a medieval rendering of Gr. *ἰχθυόεν* *ichneumon*. This last (= *ἰχθυός*) meant literally 'tracker, tracer out, hunter out', f. *ἰχθυέ-ειν* to track, trace out, hunt out, f. *ἰχθυος* track, footstep. L. *calcatris* is fem. agent-sb. of *calcare*, orig. 'to tread', in med.L. 'to tread on the heels of, track, trace out' (f. *calx*, *calcem* heel). Thus *calcatris* came to render *ichneumon*. (Prof. Thor Sundby, *Brunetto Latino's Levnet og Skrifter*, Kjöbenhavn, 1869, p. 142-4.) In OF. the word was partially popularized, as seen by the phonetic change of the original *calc-* through *caulc-* to *cauc-*, *coc-*, and *choc-*. (In Sp. it occurs only as adopted from Fr., viz. *cocatrix* (Nebrija 1512), *cocadris* (Minshew), *cocatrix* later dict.)

The sense-history of this word is exceedingly curious. The *Ichneumon*, an Egyptian quadruped, said to devour reptiles and crocodiles' eggs (which it searches for in the sand), is called by Pliny VII. 24 (35) § 88 sq., the mortal enemy of the asp and the crocodile. As to the latter, he tells that when the crocodile is asleep or dozing with its jaws open, the *ichneumon* darts down its throat, and destroys it by gnawing through its belly; a tale originating, partly at least, in the habits of the bird *trochilus*, as mentioned by Herodotus and subsequent Greek writers, and repeated in many forms by later compilers. From an early period, Western writers entertained the notion that this *ichneumon* was amphibious or aquatic; the immediate followers of Pliny appear to have identified it with the Otter (in Gr. *ἐνυδρίς*). Pliny's tale is repeated by Solinus (flor. c. 260) *Collectanea* xxxii. 25 (ed. Mommsen 160), and Isidore (a 640) *Orig.* XII. ii. 36: in the text of Solinus known to Ammianus Marcellinus (c. 400), the animal is called 'enhydros, the second kind of the ichneumons (enhydros alterum ichneumonum genus)'; while Isidore appears to make two distinct animals, the *Ichneumon* which 'serpentes insequitur... adversus aspem pugnat', and the *Enhydros* 'a little beast so called because it lives in the water, and mostly in the Nile (Enydros bestiola, ex eo vocata, quod in aquis versetur, et maxime in Nilo)'. But the Gr. *ἐνυδρίς* was not only the otter, but also a water-snake = *hydrus*; and the latter was the only sense in which *enhydros* had been used by Pliny. Later compilers took this to be the sense of *enhydros*, -os, in Solinus and Isidore, and the crocodile's enemy was now described as a 'water-snake' or 'fish'. Thus it appears in Albertus Magnus (1193-1280) *De Animalibus* xxv. (VII. 666) as 'hidra vel hydrys serpens omnium serpentum pulcherrimus'. Apparet autem in Nilo fumine, et quum crocodilus dormit, etc., as in Pliny. Meanwhile also the latinized name *calcatris* comes into view. It is found, along with the transformed description, in the version of the story given (c. 1269) by Brunetto Latino in *Li Livre dou Tresor* 185 (ed. Chabaille), where it is said 'then comes another fish, which is named *hydrus*, that is *cocatrix*, and enters within his body (lors vient un

autres poissons, qui a nom ydre, ce est cocatris [v.r. qual. quetiv] et li entre dedans le cors; further 'and you must know that cockatris, albeit he is born in the water, and within the Nile, he is not at all a fish, but is a water-serpent (Et sachiez que cockatris ja soit ce qu'il naist en l'aigue, et dedans le Nile, il n'est mie peisson, ainz est serpens d'aigue). It has been suggested that, in this, the ichneumon was confounded with another reputed enemy of the crocodile, the *varanus*, or Monitor of the Nile, which is really a reptile. The *cocatris*=*ichneumon*=*enhydris*=*hydrus*, having thus been transformed into an aquatic reptile, living in the Nile, other writers proceeded to identify it with the crocodile itself. The *Bestiaire divin* of Guillaume le Normand (c.1210) makes *cocatris* the crocodile, and *ydrus* his enemy; and in the *Bestiaire* of Richard de Fournival (c.1250) we have 'Vous m'avez fait mention en votre requeste d'un chocatris, qui est apelez par son droit nom cocodrilles'—'you have mentioned a *cocatris*, but he is called by his right name *crocodile*'. And in later French, as well as in other Romanic langs., 'crocodile' became, at least, one of the recognized meanings of *cocatris*. This confusion may have been helped in some instances by the fact that *cocodrille*, one of the commonest of the early forms of *crocodile* (see that word), had an initial similarity to *cocatris*, and may have been taken by the ignorant as only another form of the name.

In English the confusion with *crocodile* hardly appears, except once or twice as a literalism of translation. Here, *cocatris* appears from the first as the equivalent of *L. basiliscus*, or *regulus*=*basilisk*. It was thus used by Trevisa in his translation of Bartholomaeus Anglicus *De Proprietatibus Rerum* to render *basiliscus*, and what was more important, by Wyclif and his followers to translate *regulus* (Isa. xi. 8, xiv. 29, lix. 5), and *basiliscus* (Ps. xc[i]. 13) of the Vulgate. In the former of these (also in Jer. viii. 17) it was retained in the 16-17th c. versions; but in the revised text of 1885, has been changed to *basilisk*. The history of this further transition of sense is still obscure; but it is to be noticed that *cocatris* translates *F. basiliscus*, and that *coc* is app. a connecting link. But some traditional notions of the ichneumon as the enemy of the *aspis* (which appeared later in the well-known statement that the only animal which could kill the basilisk was the *mustela* or weasel) were probably contributory, as well as the mediaeval confusion, under the name *regulus*, of the basilisk (*vex serpentinus*) with the trochilus (*vex avium*, OF. *roytelet*, in mod. F. *roitelet* 'wren'): cf. Aldrovandi *Opera* (Bologna) X. 367.

Further etymological speculation, in France or England, working upon the syllable *coc*, *coq*, in *basiliscus*, *cocatris*, probably also associating the crested basilisk with the crested bird, and mingling with it vague notions of the crocodile's eggs, buried in the sand, and producing a tiny reptile, originated the well-known notion of 'a serpent hatched by a venomous reptile from a cock's (i.e. *basiliscus* or *cocatris*) egg', embodied in the heraldic monster, half cock, half serpent. As told of the basilisk, this appears already in Albertus Magnus (who however disbelieves it), in Bartholomaeus Anglicus, etc. (See Thor Sundby, above cited; also Solinus, with Commentary, ed. Salmassius 1689, Cahier & Martin *Mélanges d'Archéologie* II. 213.)

† **Cocket**, sb. 2. Obs. Also 4-7 cocket. [Origin unknown: the conjecture has been offered that this bread was so called because stamped with a seal (see COCKET sb. 1); but evidence is wanting.]

Name of a sort of leavened bread, and of a loaf, slightly inferior in quality to the wastell or finest bread.

The name appears in the *Statute of Bread and Ale*, and was apparently quite obsolete before 1500, later references to it being only historical, and conjectural. *Cocket-bread*, *Bread-cocket*, are modern renderings of *panis de coket*.

1566 *Stat. Bread & Ale* (51 Hen. VII), Quando quarterium frumenti venditur pro xiiid., tunc panis quadrantis de Wastello ponderabit sex libras et sexdecim solidos; Panis de Coket de eodem blado, & de eodem butello, ponderabit plusquam Wastellum de duobus solidis; De blado minoris precii ponderabit plusquam Wastellum de quinque.. 1. The name of a plant: now, and prob. from OE. times, applied to *Lycnis* (or *Agrostemma*) *Githago*, a caryophyllaceous plant, with handsome reddish-purple flowers succeeded by capsules of numerous black seeds, which grows in cornfields, especially among wheat. Also called *Corn Cockle*.

Known to early herbalists as *Nigella* or *Nigellastrum*, *F. nilla*. *Nigella* (dim. of *L. nigra* black, referring to the black seeds) was app. originally applied to a ranunculaceous plant, *Nigella arvensis* (or one of its congeners), a field-weed of southern regions; but in northern France and Britain, where this plant was unknown, the name was transferred to *Githago*, the black-seeded corn-weed of these regions.

2. Applied from OE. times to render or represent the *sicania* of the Vulgate in Matt. xiii, or the *lollium* with which Latin writers identified this.

Recent investigation has apparently settled that the *ζιζάνιον*, pl. -ia, of the N.T., *sicania* and *lollium* of Latin writers, was the grass *Lolium temulentum* or Darnel, a prevalent weed in Mediterranean and Levantine regions (cf. Stanley *Shut & Palestine* 426, Tristram *Nat. Hist. Bible* 487), which is very prone to be affected with *Ergot*, and in the ergotized condition is deleterious. The translation of these words by *coocel*, *coockle*, in English was (like the later erroneous rendering *tares*) due in the first instance to ignorance as to the plant meant by *sicania* or *lollium*; but it led to the further error of some scientific writers who, knowing *lollium* to be darnel, still called it 'cockle'.

[The derivation suggested above satisfies the form: *ey, ay* (*ad.*) are regular M.E. forms of *egg*, riming with the same words (*day*, etc.), as *cockney* itself; *cohen* genitive pl. is as in *clerken* *conitise*, *P. Pl.* B. iv. 119, and in many similar instances; the use of the gen. plural is as in Ger. *kühnerei*, fowls' egg, *kühnerei* cocks' egg. The stress on *ay* retained in verse to 16th c., and supported by Minshew's *cock neigh*, also accords with this composition of the word.

Of sense 1, the meaning appears to be established by the first quot.; the constituents of a COLLOE (q.v.) were precisely bacon and an egg. This meaning also completely explains the quot. from Heywood; that from the *Tournament* is perhaps (as already suggested by Wright) satirical or jocular. The matter appears to be clinched by the quot. from Florio for *cockau-egg*. To account for the appellation, we might suppose *cohen-ay* to be originally a child's name

for an egg (cf. what is said of *coco* below); but as *cocks' eggs* and the equivalent Ger. *kühnerei* are at the present day applied in popular or dialect speech to small or malformed eggs (formerly imagined to be laid by the cock), it is not improbable that this was originally the specific sense of *cohenay*. The old notion that such eggs produced a serpent (see COCKATRICE) is well known; but no trace of this appears in the popular use of *cohenay*.

The application of either a child's word for an egg, or of the name of a small or mis-shapen egg, as a humorous or derisive appellation for 'a child sucking long', a 'nestle-cock', a 'milk sop', obviously explains itself; and the sense-development from 2 onward is clear and certain. A valuable contribution to the history of these senses is made by H. H. S. Croft, in the Glossary to his ed. (1883) of Elyot's *Gouernour*.

An apparent parallel is the French word *coco* 'a child's name for an egg', also a term of endearment applied to children, and of derision applied to men: *mon petit coco*, *quel grand coco!* *Coco*, considered by Littré a deriv. of *cog*, was app. the source of *coconellus* (dim. of *coco*, *cochenet*) given in the *Promp. Parv.*, with *cucumellus*, as med. L. translations of *cohenay*, and stated to be 'ficta et derisorie dicta', 'derisorie ficta et inventa'. And *coconellus*, in turn, appears to be the origin of the 16th c. Eng. COCKNEY, given above, as an exact equivalent of *cohenay*, senses 2, 4. On F. *coco* was formed the verb *coquelineur* 'to dandle, cocker, fiddle, pamper, make a [cockney or] wanton of (a child)', just as *dodo* a word like Eng. 'by-by' or 'ba-ba', sung to lull a child to sleep, gave *doddlener* to perform this action. It is to be noted also that, from the earliest times, *cohenay* was constantly associated with the vb. *cocker* COCKER, both in use (see quots. in 2), and in L. and Fr. explanations e. g. 'cockeryn, carifveo; cockenay, carifveto', *Promp. Parv.*, 'I coker je nigotte; I bring up like a cockenay je nigotte' Palgr. If *cocker* was, as it appears to be, a derivative of *cock*, this association was natural and obvious.]

**Cock-sure** (*kpk* [ju:1], *a.* (*adv.*)) [According to the regular force of similar formations, *c.g.* *stone-deaf*, *clay-cold*, *dog-sick*, *dirt-cheap*, *coal-black*, etc., the sense ought to be 'as sure as a cock'. The conjecture that there is some allusion to *cockish*, *cocky*, with reference to 'pert self-confidence', being founded upon the latest sense, which is only a modern development, is not historically tenable. The word was originally perfectly dignified, and habitually used in the most solemn connexions. And, in early use, the sureness in question was *objective*, *i.e.* 'as secure, safe, certain, trustworthy, reliable, etc., as can be': this makes it possible that the original reference may have been to the security or certainty of the action of a cock or tap in preventing the escape of liquor, or perhaps of a cock with a removable turning-key (if these go far enough back) in leaving the contents of a tun secure from interference.

The notion 'as sure as a cock is to crow in the morning', has also been suggested. It might suit sense 2, but not sense 1.]

I. Of objective sureness, security, or certainty.

1. Absolutely secure, or safe, from danger or interference. *a.* of persons or things. *Obs.*

1522 SKELTON *Why nat to Court* 279 Why the red hat doth endure He maketh himself cock sure. 1563-87 FOXE *A. & M.* (1596) 660/2 Queene Margaret her then cocksure, when duke Humfrey was made away. *Ibid.* (1684) III. 273 Whoso dwelleth under that secret thing, and help of the Lord, shall be cock-sure for evermore. 1577-87 HOLINSHED *Chron.* I. 23/2 The princes court would not have been kept there, vlesse the place had bene taken to be cocksure. 1583 STANLEY *Unius* i. (1885) 204 My earldom is cock-sure!

5. *c.* Of persons, etc.: Absolutely certain to (do something) or of (a possession yet in prospect):

After *think*, etc., this naturally introduces the subjective uses in 4: one who thinks himself (objectively) cocksure of a coming advantage, feels or, in modern use, is (subjectively) cocksure of it.

1520 WHITTINGTON *Vulg.* (1525) 17, I have known a man or nowe that thought him selfe cocke sure of his intent. 1687 T. 2. Feeling perfectly certain, absolutely certain in

one's own mind of or about anything. (Without any implication of over-sureness or presumption.)

(Quot. 1603 is doubtful; it may belong to 2 *c.*)

1603 HARNETT *Pop. Impost.* 131 Therefore you may be Cock-sure to find him there. 1672 WYCHERLEY *Love in Wood* ii. 1, You are so positively cock-sure of your wit, you would refer to a mere stranger your plea to the Day-tie. 1835 MARRIAT *Jac. Berkshire, Cheshire, Holderness*, etc., *Cock-sure*, perfectly certain, positive.

3. Feeling or expressing oneself sure to a degree that savours of presumption or dogmatism; dogmatically self-confident; 'cocky' in one's confidence.

1755 [Johnson's] only meaning is 'Confidently certain; without fear or diffidence. A word of contempt.' Although none of his quotations bear out this character, it is evident that the modern sense must have been coming in then. 1845 BARRHAM *Ingol. Leg., Aunt Fanny*, Don't be too secure! Let seeming success never make you 'Cock-sure'! 1859 DARWIN in *Life & Lett.* (1887) II. 224, That I have written in a conceited and cocksure style. 1882 *Times* 23 Aug., Mr. Buckle... has fallen head over heels into the most abominable pitfall ever invented by a philosopher for the discomfiture of a cocksure historian. 1889 *Spectator* Nov. 30, It was Lord Melbourne... who said, 'I wish I was as cock-sure of anything as Tom Macaulay is cock-sure of everything'.

Hence *transf.* **Cock-sure** *v.*, to make cock-sure of. **Cock-suredom**, the state or habit of arrogant confidence in one's opinion. **Cocksureism** = **COCKSURENESS**. **Cock-surely** *adv.*, in a cock-sure manner. **Cock-surety** = **COCKSURENESS**.

Coco, cocoa (*kō'ko*). Forms: α. 6 coccus, 6-7 coccos; β. 6-7 coquo, (6 caco, coeco), 6-cccc; γ. 7 coquer, coocar, cocker, 7-8 coakar, 7- coaker; δ. 8-9 coccoa. [*a. Pg.* and *Sp.* *coco*; in 16th c. L. *cocus*. The early writers, from Cosmas 545 to the 15th c., knew it only as the *Indian nut* or 'nut of India'; *coquos* (plural) is quoted first from the *Roteiro de Vasco da Gama* (Portuguese, 1498-9); Barbosa 1516 has (*Pg.*) *quoquos*; Pigafetta 1519 has (*It.*) *coche pl. of coca*; Oviedo 1526, Barros 1553, Garcia 1563, and Acosta 1578 have *coco*; Correa 1561 *coquo*. The Portuguese and Spanish authors of the 16th c.

agree in identifying the word with *Pg.* and *Sp.* *coco* 'grinning face, grin, grimace', also 'bugbear, scare-crow', cognate with *cocar* 'to grin, make a grimace'; the name being said to refer to the face-like appearance of the base of the shell, with its three holes. Historical evidence favours the European origin of the name, for there is nothing similar in any of the languages of India, where the Portuguese first found the fruit; and indeed Barbosa, Barros, and Garcia, in mentioning the Malayalam name *tenga*, and Canarese *narle*, expressly say 'we call these fruits *quoquos*', 'our people have given it the name of *coco*', 'that which we call *coco*, and the Malabars *tenga*'.

In Eng. the latinized form *coccus*, afterwards (as in *Bot. Latin*) *cocos*, was at first used, both for *sing.* and *plural*. Towards the close of the 16th c. *coquo*, *coco*, as 'the Portingalls call this fruit' (*Linschoten*), began to be used, with *pl. cocos, cocoes*. *Coco* remained the established spelling in the 18th c., till the publication of Dr. Johnson's Dictionary, in which the article *Coco* was (app. by some accident, for Johnson in his own writings used *coco*, *pl. cocoes*) run together with the article *Cocoa* (= *Cacao*); this gave currency to a confusion between the two words which still prevails, although careful writers have never ceased to use the correct form *coco*.

Another spelling, *coker*, has been used, with various modifications since about 1620 (*Purchas* has *cokers*, *Burton coquer-nuts*); it appears to be from 17th c. Dutch *koker-noot*, and has long been in commercial use at the port of London to avoid the ambiguity of *cocoa*.

The Greek words *κόκκι* and *κόκη* applied by Theophrastus, and, after him, by Pliny (*cōci*, *cōkē*), to certain palmaceous trees, have both been suggested as sources of the name, but without any ground, except their distant resemblance to *coco*. Connexion with *Sp.* *coca*, *F.* *coche*, and the family of *L. cancha* shell is also philologically untenable.]

5. Double Coco-nut, in Fr. *coco-de-mer*, *coco-des-Maldives*, the immense woody nut of a gigantic palm *Lodoicea sechellarum*, found native only on the small islands, Praslin and Curieuse, of the Seychelles group. The fruit weighs 40 or 50 pounds, is covered with a thick fibrous husk, and contains from one to three stones, or 'nuts', about 28 inches long, covered with excessively hard and thick black shells, each divided half-way down into two lobes, whence the name.

Before the discovery of these islands in 1743, the source of these nuts, which were often found floating on the Indian Ocean, or thrown up on the shores of the Maldiv Islands, was enveloped in mystery and fable.

[The later forms *quodding*, *codling*, are perh. corruptions of the earlier *querdling*. The latter is explained in the Promptorium as *duracenum*, app. L. *duracinus*, -um 'hard-berried, hard', orig. said of the grape, hence of other fruits, as peaches, cherries, etc. Assuming that *querdling* had a meaning corresponding to this, it has been suggested that it might be a derivative of ME. *quert* 'sound'; though this is not very satisfactory either in form or in sense.

Palgrave's explanation *pomme crute*, and Skinner's *pomum cotile*, together with the very frequent references in the 17th c. to the codding of apples or pippins (see CODDLE v.), and the frequent spelling of the latter with *qu-*, seem to show that the two words were thought to be connected. But the form *querdling*, the late appearance of the verb *coddle*, and want of early examples of a descriptive phrase 'codding apple', all tend to indicate that this association was non-original and incidental.]

1. A variety of apple, in shape elongated and rather tapering towards the eye, having several modern sub-varieties, as Kentish Codling, Keswick Codling, etc.

From the beginning the name seems to have been applied to a hard kind of apple, not suitable to be eaten raw; hence to any immature or half-grown apple. In the beginning of the 17th c. it was applied to a variety suitable to be cooked while still unripe; but the peculiar codling shape appears to have determined the modern application.

Some have conjectured that it is a foreign, perh. 1. One of a series of teeth or similar projections on the circumference of a wheel, or the side of a bar, etc., which, by engaging with corresponding projections on another wheel, etc., transmit or receive motion.

Cogs are either separate wooden pieces attached by mortices and the like, or are cut out of the substance of the wheel, or cast in one with it. The name was probably first given to the wooden pins inserted sideways into the rim of a wheel, which caught the rungs or trundles of a lantern-wheel; hence *cog and round*, a mechanical arrangement of this type. *Hunting cog*: in cogged wheels which have a certain proportion to each other, an extra cog given to the larger, by which there is secured

a continuous change of cogs engaging with each other and consequently equal wear.

[This vb. and the corresponding *Cog sh. l.* appear together in 1532, as 'Ruffians' terms' of dice-play; whence they passed into general use in various transferred senses. As in other cant terms, the origin has not been preserved; but the persistent notion is that of dishonest or fraudulent play, cheating.]

**1**. *intr.* (*Dicing*). To practise certain tricks in throwing dice.

From contextual evidence it would seem that 'cogging' generally designated some sleight of hand, made use of to control the falling of a die; occasionally it may mean the substitution of a false die for the true one. The notion that it meant 'to load the dice' appears to be a mistake of modern dictionaries, which has, however, strongly influenced the use of the word by modern novelists, etc.; cf. esp. *Cogged ppl. a*. The following quotations show the change of explanation in the Dicts.: c 1600 B. E. *Dict. Cant. Crew*, *Cog*, to cheat at Dice; *Cog a Die*, to conceal or secure a Die. 1730-6 *BAILEY, Cog*, to conceal a Die, or by Art to make it come up what Number one will have. 1755 *JOHNSON, To cog a die*, to secure it, so as to direct its fall; to falsify. So 1847 in *CRAIG*. 1847-78 *HALLIW.* *Cog*, to load a die: so some later Dicts.

1532 *Dice Play* (1850) 28 When fine squarers only be stirring, there rests a great help in cogging; that is when the undermost die standeth dead by the weighty fall of his fellow; so that if vi be my chance and x yours, grant that upon the die I cogge and keep away an ace deuce or tray, I may perhaps soon cast vi, but never x. 1545 *ASCHAM Toxophil.* (Arb.) 54 What false dice vse they? as dice stopped with quicksilver and heares.
